Applicant	ECOLAB	INC.					
 This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36. This REPORT consists of a total of 6 sheets, including this cover sheet. This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been 							
amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT). These annexes consist of a total of sheets.							
This report contains indications relations.

III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability					
1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:					
the entire international application.					
claims Nos					
se:					
the said international application, or the said claims Nos					
the description, claims or drawings (indicate particular elements below) or said claims Nosare so unclear that no meaningful opinion could be formed (specify):					
the claims, or said claims Nos are so inadequately supported by the description that no meaningful opinion could be formed.					
no international search report has been established for said claims Nos					
 A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions: 					
the written form has not been furnished or does not comply with the standard.					
the computer readable form has not been furnished or does not comply with the standard.

2. Citations and explanations

The following documents (D) are relevant to the present application; the same numbering will be used throughout the procedure:

- D1: US-B1-6 258 368 (BAIER KATHLEEN GRIESHOP ET AL)
 10 July 2001 (2001-07-10)
- D2: US-A-4 661 523 (PAGEL JUERGEN ET AL) 28 April 1987 (1987-04-28)
- D3: WO 98/56886 A (ROSENBERG NEVO MELVYN; INNOSCENT LTD (IL)) 17 December 1998 (1998-12-17)
- **D4:** US-A-5 929 016 (HARRISON KENNETH A) 27 July 1999 (1999-07-27)
- **D5**: EP-A-1 126 014 (BODE CHEMIE GMBH & CO) 22 August 2001 (2001-08-22)
- D6: WO 94/27436 A (DECICCO BENEDICT T; KEEVEN JAMES KEVIN (US)) 8 December 1994 (1994-12-08)
- D7: FR-A-2 622 397 (SOGEVAL) 5 May 1989 (1989-05-05)
- D8: DE 100 54 020 A (GOGNIS DEUTSCHLAND GMBH) 16 May 2002 (2002-05-16)

(The present report does not necessarily cite all of these documents).

This report uses the following abbreviations: page (p.),

International application No. PCT/EP 03/06274

column (col.), line (l.), example (ex.), claim (c.),
figure (fig.).

0. Introductory remark

0.1 The international search was restricted to claims
10-13 with the compounds given as examples on page
12 of the present description. This report therefore
likewise only covers the searched scope of the
claims 10-13.

1. PCT Article 33

- 1.1 PCT Article 33(2) (Novelty)
- 1.1.1 Claims 10-13 meet the requirements of PCT Article 33(2).
- 1.2 PCT Article 33(3) (Inventive step)
- 1.2.1 Claim 10 (scope limited to the compounds indicated in the examples) meets the requirements of PCT

 Article 33(3):

It is stated on page 3, final paragraph to page 5, first paragraph of the description that the problem addressed by the application, namely reducing the adsorption of antimicrobial agents by cleaning textiles, is solved by treating cleaning textiles with an aqueous concentrate containing an antimicrobial agent (inter alia, phenols and phenol derivatives) and an additive (e.g. Polyquat (R)).

D1 introduces an antimicrobial wipe that is impregnated with a composition containing Polyquat

PCT/EP 03/06274

10 and Triclosan in the same amounts as in the present application (see example 14). For the sake of completeness, attention is also drawn to the fact that **D1** describes glutaraldehyde (see col. 6, 1. 33) and a variety of other phenol compounds and phenol derivatives (see col. 6, 1. 51 - col. 8, 1. 12) as possible further antimicrobial agents.

The problem addressed by the present application is therefore already implicitly solved in D1.

Claim 10 proposes a further solution, namely that first a treatment with Polyquat (R) 40 is carried out, then a subsequent treatment with one of the preparations E1, E2 or E3 described on page 12 of the description.

This solution is neither disclosed nor suggested in the cited documents and is therefore deemed inventive.

- 1.3 PCT Article 33(4) (Industrial applicability)
- 1.3.1 Industrial applicability is established for all the subjects of claims 10-13.
